

ParkSpace: Demo Guide

Every flow, screen by screen, with what you're seeing and what to say.

Proof-of-concept build · captured on a phone-sized screen · UK launch market (GBP) · Working name: ParkSpace (placeholder brand)

How to use this guide

The demo follows nine short flows, about 25 minutes in total, or pick the ones that matter to your audience. Each card shows the screen, **what you are seeing**, and a suggested line to **say**. The coloured tag shows who is logged in: Driver, Host or Admin.

Before you start

1. Open the app: <https://saeedmurrad.github.io/driveway-parking-app/>
2. Wake the backend about a minute earlier by opening <https://parkspace-api.onrender.com/health>. The free hosting tier sleeps when idle.
3. Use two browser windows (one normal, one private) so you can be the driver and the host at the same time.
4. Use the demo role buttons on the login screen, or the accounts below. Password for all: **demo1234**.

Role	Login	Notes
Driver	driver@demo.parkspace.test	Has two vehicles (one electric)
Host 1	host@demo.parkspace.test	King's Cross, Euston, Bloomsbury, Camden, Islington
Host 2	omar@demo.parkspace.test	Shoreditch, Waterloo (request-to-book), Canary Wharf (awaiting approval)
Admin	admin@demo.parkspace.test	Can also switch to Driver mode

Good to know

- Payments are **simulated**, and email, SMS and push messages are shown in-app. Demo mode shows verification codes on screen.
- The dispute window is set to **2 minutes** so host payouts can be shown live. The spec's default is 24 hours.
- On a free tier the first load after a quiet spell can take about a minute.

1. Sign in and find a space

The driver's journey starts here. About 3 minutes.

1

Welcome screen

Anyone

WHAT YOU SEE

Sign in, create an account, or tap a demo role (Driver, Host, Admin).

SAY

One app for drivers, hosts and the platform team. Demo buttons let anyone try each role in one tap.

2

Find a space on the map

Driver

WHAT YOU SEE

A live map with price pins and photo cards sorted by distance, with tags for Offers and Request-to-book. Filters for time, duration, covered, CCTV, EV and price.

SAY

Drivers see nearby spaces they can actually book for their chosen time. Spaces already booked don't appear.

3

Space details

Driver

WHAT YOU SEE

Photo gallery, rating, features, the booking time and the driver's vehicle. Make an offer or Book now.

SAY

Everything needed to decide, in one screen. The exact address stays hidden until payment.

4

Paid extras and live price

Driver

WHAT YOU SEE

Ticking CCTV reprices the stay on the server: £5.00 parking + £1.50 extra = £6.50. No service fee.

SAY

Hosts earn more from add-ons like CCTV, EV charging or a car wash, and the commission applies to the full total.

5

Confirm and pay

Driver

WHAT YOU SEE

A payment sheet with the stay, the vehicle and a test card. Payment is simulated in this proof of concept.

SAY

In production this is Stripe (cards, Apple Pay, Google Pay) with the platform fee split automatically.

6

Booking confirmed, address revealed

Driver

WHAT YOU SEE

A confirmed booking shows the exact address, access instructions and a link to open maps.

SAY

Only after payment does the driver get where to park. The booking has a reference and its own timeline.

2. During the stay

I've parked, chat, extend, end and rate. About 3 minutes.

7

I've parked

Driver

WHAT YOU SEE

Tapping it offers an optional photo of the parked car. The phone's location is also recorded if the driver allows it.

SAY

A time-stamped check-in protects both sides in a damage dispute. A warning shows if the driver is more than about 200 m away.

8

Active booking

Driver

WHAT YOU SEE

The booking is now Parked. The driver can End booking, Extend, chat with the host, view a receipt or report a problem.

SAY

Everything the driver needs while parked is in one place.

9

In-app chat

Driver

WHAT YOU SEE

A message to the host appears instantly and the host is notified.

SAY

Chat opens only once a booking is confirmed, and is saved in case of a dispute.

10

Extend the stay

Driver

WHAT YOU SEE

Choose +1, +2 or +4 hours. Extra time is charged straight away at the hourly rate, if the space is free.

SAY

A driver running late can extend in two taps, unless the next booking is right behind them.

11

Booking ended

Driver

WHAT YOU SEE

The stay is Completed with booked and actual times. The extension added £2.50 to the parking: £9.00 total.

SAY

History always shows booked versus actual times, and nothing is ever deleted.

12

Rate the space

Driver

WHAT YOU SEE

A five-star rating with an optional comment.

SAY

Ratings feed the space's score. Hosts rate drivers too, and hosts see a driver's rating on requests and offers.

13

Receipt, chat and timeline

Driver

WHAT YOU SEE

Receipt, Report a problem and Book again buttons, plus a timestamped timeline: created, paid, confirmed, parked, extended, ended.

SAY

The timeline is the single source of truth for disputes: who did what, and when.

14

Receipt

Driver

WHAT YOU SEE

An itemised receipt with parking, extras and the total charged.

SAY

A copy is emailed in production. Hosts get an earnings statement per booking instead.

3. History and spending

Totals come from the payment ledger, never a stored balance. About 1 minute.

Offers

Spending

Profile

WHAT YOU SEE

Spent this month, this year and all time, plus receipts and a CSV statement.

SAY

These totals are calculated from the ledger, so they can never drift out of sync.

4. Price negotiation

A feature the main competitors don't show. About 4 minutes.

17 Make an offer Driver

WHAT YOU SEE
The driver offers a total price against the listed £6.00. Times are fixed once sent.

SAY
Drivers can negotiate. Phone numbers, emails and links are blocked in messages so deals stay on the platform.

18 Below the host's minimum Driver

WHAT YOU SEE
A £3.00 offer is declined automatically because the host set a lowest acceptable price.

SAY
Hosts set a floor once and never see lowball offers. The driver is told the listed price is still available.

19 Offer sent Driver

WHAT YOU SEE
A valid £4.50 offer is open. It expires in 30 minutes because the stay is starting soon.

SAY
Offers expire so nobody waits forever. The slot is not reserved while negotiating.

20 Host is notified Host

WHAT YOU SEE
The host's bell lists the new price offer, plus earlier bookings, messages and arrivals.

SAY
Push, email and SMS channels are wired in the backend. In the demo they appear in-app.

21 Offers inbox Host

WHAT YOU SEE
The offer is highlighted as Your turn, next to the earlier declined one.

SAY
Hosts see exactly which negotiations are waiting on them.

22 Accept, counter or decline Host

WHAT YOU SEE
The host sees the driver's £4.50 against the £6.00 list price, and can Accept, Counter or Decline.

SAY
Up to three counter-offers are allowed per negotiation, then it closes.

23 Counter-offer

Host

WHAT YOU SEE

The host counters with £5.00 and can add a short message.

SAY

A counter-offer can't go above the listed price.

24 Counter sent

Host

WHAT YOU SEE

The history shows both sides: driver £4.50, host £5.00, with timestamps.

SAY

Every offer and counter is saved with who, how much and when.

25 Driver sees the counter

Driver

WHAT YOU SEE

The driver gets the host's £5.00 and can accept, counter or decline.

SAY

The same thread, from the driver's side.

26 Accepted: pay within 15 minutes

Driver

WHAT YOU SEE

After acceptance the driver has 15 minutes to pay, or the offer lapses.

SAY

An accepted offer turns straight into a payable booking at the agreed price.

27 Booked at the negotiated price

Driver

WHAT YOU SEE

A confirmed booking marked Negotiated price (£4.50 instead of £6.00), with the address and the gate code.

SAY

The platform's 20% applies to the final agreed price.

5. The host's side

Dashboard, spaces, availability and payouts. About 4 minutes.

28

Host dashboard

Host

WHAT YOU SEE

Money available to pay out, earned this month, pending (inside the dispute window) and all-time, with upcoming and recent bookings.

SAY

Hosts see exactly where their money is. It becomes available after the dispute window passes.

29

My spaces

Host

WHAT YOU SEE

Each space with its photo, price, bookings, earnings and rating, plus Edit, Availability and a visible-in-search switch.

SAY

Pausing a space hides it from search without cancelling existing bookings.

30

Weekly availability

Host

WHAT YOU SEE

Opening hours per day (UK time), with the option to be open 24/7 and to block specific dates.

SAY

Drivers can only book inside these hours, and a booked slot is removed automatically.

31

Add a space

Host

WHAT YOU SEE

Title, address, space type, vehicle size, photo upload and a pin drop on the map.

SAY

A new space goes to the admin approval queue before it appears in search.

32

Pricing and booking rules

Host

WHAT YOU SEE

Hourly and day rates, minimum and maximum stay, buffer between bookings, instant-book or request-to-book, and allow price offers.

SAY

Hosts control price, rules and how drivers can book.

33

Earnings

Host

WHAT YOU SEE

Available balance, pending, paid out and totals, with CSV statements. Here the balance is -£1.20 because a later refund took back a share of an already paid-out booking.

SAY

Refunds reduce the host's earnings in proportion, and the commission is refunded in proportion too.

34 Payout history

Host

WHAT YOU SEE

After tapping Pay out, the full £40.72 shows as Paid out with a dated payout entry.

SAY

Payouts are automatic in production (weekly, minimum £10). Here it's on demand.

6. Request-to-book

For hosts who want to approve each booking. About 3 minutes.

35 Search another area

Driver

WHAT YOU SEE

Tap an area chip (here Waterloo). The Request tag marks spaces where the host approves each booking.

SAY

The map re-centres and shows only spaces free for the whole chosen window.

36 Request to book

Driver

WHAT YOU SEE

The button changes to Request to book, with a note that the card is held, not charged, until the host accepts.

SAY

No charge happens unless the host says yes.

37 Awaiting host

Driver

WHAT YOU SEE

The booking shows Awaiting host with the card hold, and the driver can withdraw the request.

SAY

If the host misses the window, the hold is released automatically and the driver is told.

38 Request lands on the dashboard

Host

WHAT YOU SEE

The request appears at the top of the host's dashboard with the amount they would earn.

SAY

Hosts have 30 minutes, or less if the stay starts sooner.

39 Accept or decline

Host

WHAT YOU SEE

The request shows the commission (20%) and the host's earnings (£9.60 of £12.00). Accept or Decline.

SAY

Accepting takes the held payment and confirms the booking. Declining releases the hold.

40 Booking confirmed

Host

WHAT YOU SEE

The booking is confirmed with the driver's name and the earnings breakdown.

SAY

Hosts can still cancel, in which case the driver always gets a full refund and the host is warned.

7. When things go wrong

The reliability promise. About 2 minutes.

Booking cancelled

Fri 2 Oct, 20:47 - system

Refund issued

Fri 2 Oct, 20:47 - system

WHAT YOU SEE

The booking is cancelled with a full refund, and the report is marked Resolved automatically. The timeline shows the refund.

SAY

The host is warned, and repeated cases lead to suspension.

8. Admin

Running the platform. About 4 minutes.

43 Platform overview Admin

WHAT YOU SEE
Gross booking value, commission earned, today's bookings, parked now, users, listings awaiting approval, open disputes and low-rated users.

SAY
A live health check of the marketplace.

44 Approval queue Admin

WHAT YOU SEE
A pending space with badges for Host verified and Right-to-let declared, and Approve or Reject.

SAY
Every new space is reviewed before drivers can see it.

45 Approved Admin

WHAT YOU SEE
The queue is empty and the space is now Live. The host is notified.

SAY
Approvals are logged in the audit trail.

46 All bookings Admin

WHAT YOU SEE
Every booking with driver, host, plate, amount and status. The cancelled one shows its refund.

SAY
Tap any booking to refund or force-end it.

47 Issue a refund Admin

WHAT YOU SEE
A refund form with an amount and a reason shown to the driver.

SAY
Commission and host earnings are reduced in proportion, so the accounts always balance.

48 Disputes queue Admin

WHAT YOU SEE
An open dispute (extra not provided) and a resolved one (space occupied).

SAY
While a dispute is open, the host's payout for that booking is frozen.

49 Dispute evidence

Admin

WHAT YOU SEE

The report, the extra in question, the chat log and the full booking timeline.

SAY

Admins decide with all the evidence in one place.

50 Resolve the dispute

Admin

WHAT YOU SEE

Choose a refund (capped at the extra's price here) or no refund, add a note, and optionally warn or suspend a user.

SAY

Both parties are notified of the decision.

51 Resolved

Admin

WHAT YOU SEE

The dispute shows the decision and a £1.50 refund, and the timeline gets a refund entry.

SAY

The host's payout is released once the dispute closes.

52 Users

Admin

WHAT YOU SEE

Search users, see verification, bookings and ratings, and suspend, reinstate or verify.

SAY

A suspended user's access stops immediately.

53 Platform settings

Admin

WHAT YOU SEE

Commission rate, dispute window, grace period, overstay fee, response times and minimum payout.

SAY

Changing the commission only affects new bookings. Old bookings keep the rate they were made with.

54 Audit log

Admin

WHAT YOU SEE

Every admin action with who did it, when and the details.

SAY

Full accountability for refunds, approvals and setting changes.

9. New user, verification and privacy

Registering safely. About 3 minutes.

55 Create an account

New user

WHAT YOU SEE

Name, email and password, an option to also host, and acceptance of the Terms and Privacy Policy.

SAY

The terms version and time are stored with the account.

56 Ready to register

New user

WHAT YOU SEE

The form filled in with the terms accepted.

SAY

Terms and Privacy are editable by admins, and each edit bumps the version.

57 Verify email

New user

WHAT YOU SEE

A 6-digit code is sent. In demo mode the code is shown on screen because no real email is sent.

SAY

Users must verify before they can book or list a space.

58 Email verified

New user

WHAT YOU SEE

The email is confirmed and the phone step opens.

SAY

Two checks keep fake accounts out.

59 Verify phone

New user

WHAT YOU SEE

The phone number gets a text-message code. Again the demo shows the code on screen.

SAY

SMS delivery plugs into a provider such as Twilio.

60 All set

New user

WHAT YOU SEE

Both checks passed.

SAY

The account can now book or list.

61 Profile

New user

WHAT YOU SEE

Vehicles, a Become a host option, and account and privacy links.

SAY

Drivers add their vehicles, including electric ones with a connector type.

62 Privacy and your data (UK GDPR)

New user

WHAT YOU SEE

Verified status, Terms, Privacy, Help, Download my data and Delete my account.

SAY

Users can export everything we hold or delete their account. Financial records are kept as the law requires and the rest is anonymised.

Wrap-up talking points

- **Reliability first:** the instant refund when a space is blocked, host-cancellation refunds and a disputes desk answer the biggest complaints about competing apps.
- **Beyond booking:** price negotiation, paid extras (including EV charging matched to the car), request-to-book and overstay handling are built and working.
- **Money you can trust:** every total comes from a payment ledger, the commission rate is stored per booking, and every admin action is logged.
- **Decision for stakeholders:** the planned 20% host commission is higher than JustPark's reported host fee. See the competitor analysis for options.
- **Next steps:** real Stripe payments, real email/SMS/push, insurance and legal terms, and a launch-area supply plan.
